Lacing also helps kids to practice the precursor skills for shoe tying and sewing.
Our lacing cards can be used over and over to practice these skills.
They are stored in a wooden box.

Price R 280 (VAT excl)
The Lika Find the bugs Box is filled with rainbow rice for fun sensory play. The texture of rice basically helps “wake up” those receptors in the skin so they can interpret sensory input more accurately in preparation for the fine motor skill development. Sensory play builds nerve connections in the brain’s pathways which lead to the child’s ability to complete more complex learning tasks. Finding the bugs will improve concentration and keep little ones busy for hours. Children have to find the bugs by digging through the rice and then placing them on the matching bug, printed on the lid. Very little coloring of Hands during play. Safe for little ones, all food approved products used for Rainbow Rice. Refill bags of 750gr Rainbow Rice available.

Find the bugs (Age 2-8) Sensory Box

R 350 (VAT excl) Replacement rice R 75 (VAT excl)
Decorate Puzzles (Age 2-8)

Puzzles provide the opportunity for children to develop fine motor skills. The Lika Decorate puzzle going from small to large pieces will also improve hand-eye coordination. For a child to colour his/her own puzzle just adds to the fun, improves concentration and coordination for early writing skills. Easy to clean and color over and over again.

Available for boys and girls.

Price R 216 (VAT excl)

Shapes Puzzle (Age 2-8)

Learning and recognise shapes is an important step on the way to learn to recognize letters. Letters contains lots of different shapes - circles, lines, parts of triangles and curves. The ability to use shapes to describe objects will greatly enhance a child's ability to verbally communicate.

Price R130 (Vat excl)
Flower Puzzle (Age 2-8)

Working on Puzzles reinforce the connections between our brain cells and form new ones. Puzzles is a great way of improving short term memory.

Children use short term memory in the process of completing a puzzle when they remember shapes, sizes, colour and visualize where they fit in.
